TO: All DevCon Speakers and Workers

FROM: Gail Wellington

Thank you for your efforts that helped make San Francisco DevCon a tremendous success. The following are typical of the comments we have been receiving.

" I would like to congratulate you for organising the best Amiga developers conference yet. Both content and organisation were of the highest standard..."

International Software
Design and Marketing
Leicester, England

"I had a great time at the conference. It is good to see that Commodore is moving in the right direction regarding making the Amiga easier to use, listening to developers, increasing staff, advertising the Amiga name to the general public, and penetrating its market niches."

Powervision
Orange, CA

"...thank you again for a very rewarding and educational Dev-Con. I left with a new, more positive outlook about Commodore and the software market as well as feeling much more informed about the technical side."

Soft Designs, Inc.
Los Angeles, CA

This time it wasn't only Amiga that made it possible, but the hard work and co-operative spirit of all of you. Thanks again.

Mark -
Although you weren't in Taiwan with us, I wanted you to know how much I appreciate the "behind the scenes" work you did. G
